INSTRUCTIONS FOR OPERATION OF DIAL TELEPHONES

GENERAL

Obtain the correct number from the directory.

Do not dial until you hear the dial tone, a steady humming sound.

If your finger slips when dialing, or if you make a mistake, hang up the receiver a few seconds and begin again.

Do not move the receiver hook while talking.

If the number dialed is busy a "buzz-buzz-buzz" sound will be heard. Hang up the receiver, wait a reasonable time and dial the number again.

If the number dialed is not busy a frequent "burr-rr-ing" sound will indicate that the number is being rung.

CALLS TO TELEPHONES SERVED BY THE DEPARTMENT OF AGRICULTURE MAIN SWITCHBOARD.

Example - A call for extension 653

Remove receiver.

Listen for the dial tone.

Place your finger in the opening over the numeral 6.

Move the dial clockwise until you strike the finger stop.

Remove finger and allow the dial to return to normal position.

Dial the numerals 5 and 3 in order in a similar manner.

CALLS TO OTHER GOVERNMENT DEPARTMENTS:

Do not call Government Departments by their central office number.

Where direct tie lines are provided to other Government departments, code numbers are dialed to reach these organizations.

Where direct lines are not provided, calls are routed through the Interdepartmental (Government) switchboard, which is also reached by dialing a code number, 80. A list of departments, together with their Code numbers is as follows:

If you receive the "busy" signal, hang up for a short interval and dial again.

TOLL AND LONG DISTANCE CALLS:

After dial tone is heard, dial the figure "0" and give the call to the DEPARTMENT operator.

SIGNALLING THE OPERATOR:

Calls originating on dial equipment in Department of Agriculture cannot be transferred. On incoming central office calls and other calls handled by the operator you may signal the operator to transfer the call to another telephone or for any purpose by moving receiver hook up and down.
